Custom typography

What html2pdf keeps

Screen styles, not print

By default this card keeps its colored background, soft shadow, and rounded corners. The default `@media print` rules in most browsers would strip them — html2pdf uses `emulateMediaType('screen')` instead.

`emulateMedia: screen`

Sticky elements disabled

Sticky nav bars and timeline labels would normally repeat on every page of a long document. html2pdf disables `position: sticky` before capture, so each element only appears once.

`no-repeat sticky`

Sample timeline

14:30

Departure

Top up fuel, download offline maps, swap drivers every 2 hours.

19:00

Check in

Two rooms, free cancellation, parking included.
